

Whiteleg shrimps

Litopenaeus vannamei (Crustaceans)

Whiteleg shrimps (*Litopenaeus vannamei*, often still referred to in trade as *Penaeus vannamei*) are the dominant farmed shrimp species in the world and the true industrial backbone of the global shrimp business. Originally native to the eastern Pacific coast of the Americas, the species is now cultured across Asia and Latin America on a massive scale. Commercially, whiteleg shrimp has become the benchmark for modern shrimp aquaculture because it combines fast growth, strong farming adaptability, and year-round availability.

From a product perspective, whiteleg shrimp is valued for its clean flavor, broad size range, uniform appearance, and exceptional processing flexibility. It is marketed in virtually every commercial format, including HOSO, HLSO, peeled, deveined, cooked, breaded, tail-on, tail-off, retail packs, and industrial foodservice lines. Compared with tiger shrimp, it is less dependent on premium image and far more important as a standardized global raw material for processing, retail, and catering.

By commercial weight, the leading producing countries are China, Ecuador, India, Indonesia, and Vietnam, with Thailand, Brazil, and Mexico also remaining important suppliers. In market terms, whiteleg shrimp is best understood as the world's core shrimp commodity, valued for scalability, consistency, and broad market access rather than for exclusivity.

Categories: HoReCa, Retail.

Size: HOSO/HLSO: 16-20 / 21-25 / 25-30 / 30-40 / 40-50 / 50+

Countries:	Nutrition data:	Product forms:	Processing:
China	Calories: 90-110 kcal.	RHOSO	IQF
Ecuador	Protein: 18.0-20.0 g.	CHOSO	Semi-IQF
Indonesia	Fat: 0.5-2.0 g.	RHLSO	
India	Omega 3: 0.5 g.	PUD	
Vietnam	Water: 55 g.	P&D

About **SEA CHEF TECHNOLOGIES**

SIA Sea Chef Technologies is an international seafood trading and sourcing company built on a simple idea: to connect reliable seafood production with professional, stable service through strong management, disciplined execution, and modern IT tools. Over time, the company has grown from a focused team into a structured organization with employees and agents operating across different markets, working with a broad portfolio of **frozen and fresh fish, shrimps, and molluscs**. Our growth has been practical rather than theoretical. Every customer, supplier, and project has helped us refine the way we work, from purchasing and quality control to logistics, documentation, and risk management.

We operate in the international seafood B2B segment. Our role is not simply to buy and sell fish, but to create dependable supply solutions in a global market shaped by seasonality, catch volumes, quotas, logistics costs, regulations, currency fluctuations, and shifting customer needs. We combine product expertise with structured internal processes so that our customers receive the right product, in the right quantity, with the right documentation, and in a quality fully suited to its final use. **In this sense, our real product is not only seafood itself, but also information, service, and execution.**

We serve a broad range of professional customer segments across the seafood chain, including importers and wholesalers, processors, distributors, HoReCa businesses, and supermarket chains. Some of our customers are direct end users with highly specific quality and compliance requirements, while others rely on us as a sourcing and logistics partner to bridge information gaps and secure stable supply. What unites them is the need for a professional counterpart who understands seafood products, works confidently with specifications and volumes, and can support both long-term supply programs and spot business. Our customers value speed, clarity, accuracy in documentation, honest communication, and reliable complaint handling, because their own success depends on stable performance from every supplier in the chain.

Our company is guided by a clear set of core principles: promptness, reliability, transparency, and long-term partnership. This combination of product knowledge and process discipline is what defines Sea Chef Technologies and allows us to serve the international seafood market with confidence and consistency.

**The right quality fish. For the right customer.
At the right time. Delivered globally.**
