

Yellow croaker

Micropogonias furnieri (Groundfish)

Yellow croaker or Whitemouth croaker (*Micropogonias furnieri*) is a commercially important coastal fish of the *Sciaenidae* family, naturally distributed along the western and southwestern Atlantic, from the Caribbean and northern South America down to Argentina. It is a demersal species typically found in shallow coastal waters, estuaries, and over sandy or muddy bottoms, with juveniles often inhabiting estuarine areas and older fish moving into deeper coastal zones.

This gives the species a strong regional importance in South American fisheries, particularly in Brazil, Uruguay, and Argentina. From a commercial perspective, whitemouth croaker is a well-established food fish with broad local and regional demand. It is used mainly for human consumption and is marketed in several forms, including fresh whole fish, frozen WR, HG and pan ready HG products, fillets, and salted fish. Its commercial appeal lies in its light flesh, mild taste, and good versatility in both cooking and processing, which make it suitable for everyday consumption as well as for industrial use.

The main commercial fisheries for yellow croaker are concentrated in southern Brazil, Uruguay, and Argentina, where the species is one of the key components of coastal fishing activity. It is therefore best positioned as a dependable regional Atlantic species, valued for availability, familiarity, and practical processing potential rather than for premium or luxury market placement.

Categories: Wholesale, HoReCa, Retail.

Size: Size: 100/200, 300/500, 500/1kg, 1kg/up

Countries:

Argentina
Brazil
Mexico
Uruguay

Nutrition data:

Calories: 104 kcal.
Protein: 19 g.
Fat: 1.5 g.
Omega 3: 0.2 g.
Water: 78 g.

Product forms:

WR
WR/Gutted

Processing:

Landfrozen

About **SEA CHEF TECHNOLOGIES**

SIA Sea Chef Technologies is an international seafood trading and sourcing company built on a simple idea: to connect reliable seafood production with professional, stable service through strong management, disciplined execution, and modern IT tools. Over time, the company has grown from a focused team into a structured organization with employees and agents operating across different markets, working with a broad portfolio of **frozen and fresh fish, shrimps, and molluscs**. Our growth has been practical rather than theoretical. Every customer, supplier, and project has helped us refine the way we work, from purchasing and quality control to logistics, documentation, and risk management.

We operate in the international seafood B2B segment. Our role is not simply to buy and sell fish, but to create dependable supply solutions in a global market shaped by seasonality, catch volumes, quotas, logistics costs, regulations, currency fluctuations, and shifting customer needs. We combine product expertise with structured internal processes so that our customers receive the right product, in the right quantity, with the right documentation, and in a quality fully suited to its final use. **In this sense, our real product is not only seafood itself, but also information, service, and execution.**

We serve a broad range of professional customer segments across the seafood chain, including importers and wholesalers, processors, distributors, HoReCa businesses, and supermarket chains. Some of our customers are direct end users with highly specific quality and compliance requirements, while others rely on us as a sourcing and logistics partner to bridge information gaps and secure stable supply. What unites them is the need for a professional counterpart who understands seafood products, works confidently with specifications and volumes, and can support both long-term supply programs and spot business. Our customers value speed, clarity, accuracy in documentation, honest communication, and reliable complaint handling, because their own success depends on stable performance from every supplier in the chain.

Our company is guided by a clear set of core principles: promptness, reliability, transparency, and long-term partnership. This combination of product knowledge and process discipline is what defines Sea Chef Technologies and allows us to serve the international seafood market with confidence and consistency.

**The right quality fish. For the right customer.
At the right time. Delivered globally.**
