

## Yellowfin tuna

*Thunnus albacares* (Pelagics)

Yellowfin tuna (*Thunnus albacares*) is a large migratory pelagic species of the *Scombridae* family, widely distributed in tropical and subtropical waters of the Atlantic, Pacific, and Indian Oceans. It is one of the most important commercial tuna species in the world, valued for its broad availability, strong market recognition, and versatility in processing.

Yellowfin tuna is used mainly for human consumption and is marketed in a wide range of product forms, including whole round fish, loins, chunks, fillets, steaks, frozen portions, canned products, and sashimi-grade items. Its commercial value is linked to its firm texture, rich red flesh, mild but distinctive flavour, and suitability for both high-end fresh markets and large-scale industrial processing.

The species supports major international fisheries and is caught mainly by purse seine, longline, and pole-and-line vessels. The main producing and processing regions include Southeast Asia, the Western and Central Pacific, the Indian Ocean, and parts of Latin America, making yellowfin tuna one of the key globally traded species in the seafood industry.

**Categories:** HoReCa, Retail.

**Size:** Steaks - 2,0-2,5 cm / Loins 1-2 / 2+ kg - vacuum

<b>Countries:</b>	<b>Nutrition data:</b>	<b>Product forms:</b>	<b>Processing:</b>

## About **SEA CHEF TECHNOLOGIES**

**SIA Sea Chef Technologies is an international seafood trading and sourcing company built on a simple idea: to connect reliable seafood production with professional, stable service through strong management, disciplined execution, and modern IT tools.** Over time, the company has grown from a focused team into a structured organization with employees and agents operating across different markets, working with a broad portfolio of **frozen and fresh fish, shrimps, and molluscs**. Our growth has been practical rather than theoretical. Every customer, supplier, and project has helped us refine the way we work, from purchasing and quality control to logistics, documentation, and risk management.

**We operate in the international seafood B2B segment.** Our role is not simply to buy and sell fish, but to create dependable supply solutions in a global market shaped by seasonality, catch volumes, quotas, logistics costs, regulations, currency fluctuations, and shifting customer needs. We combine product expertise with structured internal processes so that our customers receive the right product, in the right quantity, with the right documentation, and in a quality fully suited to its final use. **In this sense, our real product is not only seafood itself, but also information, service, and execution.**

**We serve a broad range of professional customer segments across the seafood chain, including importers and wholesalers, processors, distributors, HoReCa businesses, and supermarket chains.** Some of our customers are direct end users with highly specific quality and compliance requirements, while others rely on us as a sourcing and logistics partner to bridge information gaps and secure stable supply. What unites them is the need for a professional counterpart who understands seafood products, works confidently with specifications and volumes, and can support both long-term supply programs and spot business. Our customers value speed, clarity, accuracy in documentation, honest communication, and reliable complaint handling, because their own success depends on stable performance from every supplier in the chain.

Our company is guided by a clear set of core principles: promptness, reliability, transparency, and long-term partnership. This combination of product knowledge and process discipline is what defines Sea Chef Technologies and allows us to serve the international seafood market with confidence and consistency.

**The right quality fish. For the right customer.  
At the right time. Delivered globally.**
