

Yellowtail kingfish

Seriola lalandi (Pelagics)

Yellowtail kingfish (*Seriola lalandi*) is a large, fast-swimming pelagic species of the *Carangidae* family, naturally distributed through warm-temperate waters of the southern hemisphere. It is a powerful schooling predator found around coastal reefs, offshore structures, and adjacent open waters, which gives it a strong identity as both a wild premium fish and a modern aquaculture candidate.

Commercially, yellowtail kingfish has developed from a regional high-value catch species into a recognized premium farmed fish, especially in sashimi and fresh chilled markets. From a product perspective, yellowtail kingfish is valued for its firm, clean flesh, rich but balanced taste, and excellent raw eating performance. It is marketed mainly for human consumption in fresh, chilled, frozen, and sashimi-grade formats, with strong relevance for loins, fillets, portions, and premium whole-fish programs.

Commercial farming is now established in Australia, New Zealand, Chile, Mexico, and parts of Europe, while newer RAS production is expanding the species' year-round supply potential. In market terms, yellowtail kingfish is best positioned as a premium high-value marine finfish, competing on freshness, texture, and eating quality rather than on bulk volume. The most commercially relevant producing regions today are Australia, New Zealand, and Chile, with additional farming expansion in the Netherlands and Denmark and a long-standing broader *Seriola* culture tradition in Japan.

Categories: Wholesale, Processing, HoReCa.

Size: 2-10 kg

Countries:

New Zealand

Nutrition data:

Calories: 185 kcal.

Protein: 24.0 g.

Fat: 15.0 g.

Omega 3: 4.5 g.

Water: 60 g.

About **SEA CHEF TECHNOLOGIES**

SIA Sea Chef Technologies is an international seafood trading and sourcing company built on a simple idea: to connect reliable seafood production with professional, stable service through strong management, disciplined execution, and modern IT tools. Over time, the company has grown from a focused team into a structured organization with employees and agents operating across different markets, working with a broad portfolio of **frozen and fresh fish, shrimps, and molluscs**. Our growth has been practical rather than theoretical. Every customer, supplier, and project has helped us refine the way we work, from purchasing and quality control to logistics, documentation, and risk management.

We operate in the international seafood B2B segment. Our role is not simply to buy and sell fish, but to create dependable supply solutions in a global market shaped by seasonality, catch volumes, quotas, logistics costs, regulations, currency fluctuations, and shifting customer needs. We combine product expertise with structured internal processes so that our customers receive the right product, in the right quantity, with the right documentation, and in a quality fully suited to its final use. **In this sense, our real product is not only seafood itself, but also information, service, and execution.**

We serve a broad range of professional customer segments across the seafood chain, including importers and wholesalers, processors, distributors, HoReCa businesses, and supermarket chains. Some of our customers are direct end users with highly specific quality and compliance requirements, while others rely on us as a sourcing and logistics partner to bridge information gaps and secure stable supply. What unites them is the need for a professional counterpart who understands seafood products, works confidently with specifications and volumes, and can support both long-term supply programs and spot business. Our customers value speed, clarity, accuracy in documentation, honest communication, and reliable complaint handling, because their own success depends on stable performance from every supplier in the chain.

Our company is guided by a clear set of core principles: promptness, reliability, transparency, and long-term partnership. This combination of product knowledge and process discipline is what defines Sea Chef Technologies and allows us to serve the international seafood market with confidence and consistency.

**The right quality fish. For the right customer.
At the right time. Delivered globally.**
